

Transportation Management

# WHAT WE DO WHEN YOU ASK US TO **MOVE IT.**

Chemical / Industrial

# GETTING YOUR PRODUCTS FROM HERE TO THERE ISN'T AS SIMPLE AS IT USED TO BE.

For one thing, it's more expensive. For another, it's more time critical. And if you're growing at all, you've got more markets to serve, more product to move into the markets you're already in, and not enough capacity to do either.

You need a well-designed and efficient transportation management process, as well as cost-effective service, immediate visibility, accurate historical data, and seamless execution every step of the way.

**If you don't have it, you need it. And we've got it.**

TECHNICAL SERVICES  
DEDICATED FLEET

#### What we can do to meet that need

Exel can fill every transportation management role you've got. We can oversee your entire transportation operation, help you incorporate new ideas and systems, increase performance, choose modes and carriers, consolidate shipments, audit and pay freight bills, coordinate claims, and manage things like rates and fuel costs. And we've got more than good people, good relationships and good advice. We've got the processes and technologies to make sure your shipments arrive safely and are effectively managed every step of the way, regardless of mode.

#### Why that's valuable

Having Exel manage your transportation services does more than give you one less thing to do. It actually gives you more control and less concern.

With fewer vendors and fewer tasks to manage, you and your team will have more time to focus on the other things that make your business successful. You'll also save money—on operations and your IT investment. Those two things alone will improve performance.

But Exel's expertise takes the benefit well beyond the bottom line. Our industry experience, commitment to technology and access to best practices ensure you'll have greater visibility and more control than you would if you were managing it yourself. And our dedication to HSSE will reduce your risk. In your business, that's a big bonus.

#### Why you should work with us

Choosing Exel isn't difficult to do. We know the chemical/industrial sector well. We understand the metrics that drive your business. In fact, we use them ourselves. We bring creative solutions to the table and aren't afraid to invent new ones just for you. We've got valuable relationships and exceptional resources. We're committed to continual improvement. And, though it may seem like a little thing, we're good people.

**And little things mean a lot.**

Raising expectations.
